

Searching for healthcare delivery solutions in the Global South

Globally, over 3 billion people are affected by *neglected tropical diseases*, *tuberculosis* and *malaria*. As overwhelming as this seems, we believe there is an abundance of innovative grass roots solutions successfully being implemented by passionate change-makers across **Africa**, **Asia** and **South America**.

The Social Innovation in Health Initiative is a global collaboration with technical and financial support from the Special Programme for Research and Training in Tropical Diseases (TDR), at the World Health Organization (WHO). This Initiative has been established to identify new innovative solutions, learn in greater depth about the components that have made them successful and to practically support healthcare innovators to scale their work.

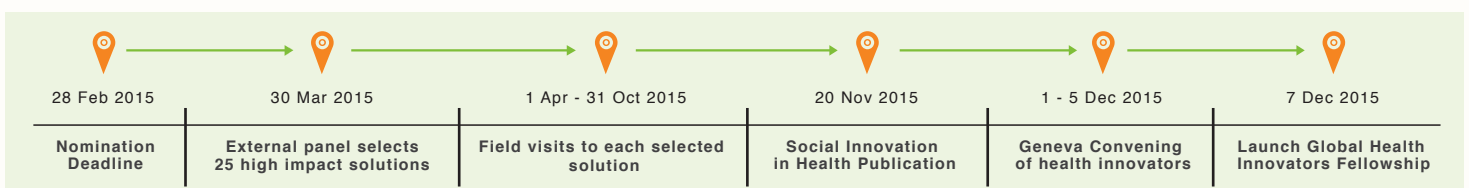

Are you an innovator or do you know an organisation that has successfully implemented an innovative solution? We want to find these solutions that made care more inclusive, effective and affordable to people across the Global South.

The Opportunities

- 1. Contribute:** By participating you can help develop the collective knowledge to improve healthcare delivery for people.
- 2. Be recognised:** Present your work to international policy makers through funded travel to Geneva. Your solution will also be recognised in an international publication on Social Innovation in Healthcare Delivery published with WHO/TDR.
- 3. Receive support:** Become part of the 2016 flagship Global Health Innovators Fellowship – a 1-year modular programme where you will be hosted at the University of Cape Town and Oxford University.

Get Involved

- 1. Nominate:** complete an online nomination form at www.healthinnovationproject.org before 28 February 2015.
- 2. Connect us:** Tell us about people whose work you think we should know about.
- 3. Spread the word:** Share this opportunity with your network or follow us on TWITTER @Innov8ingHealth.
